

Heimdall Power

Who we are

Heimdall Power is a Norwegian tech startup working on digitizing the world's power grids - the backbone of our energy system. We want to improve the world's largest human-made machine, and we've got the technology to do so. With our Heimdall Power Neuron and cloud-based software, we're increasing the grid capacity, securing its stability, and reducing the world's greenhouse gas emissions. Our products enable flexible & dynamic operation of the power grid, making it easier to integrate new sources of renewable energy. We're not just committed to the UN's Sustainability Goals; our technology can help ensure we achieve those goals.

We are hiring junior software engineers to become part of our in-house team. You will help design, develop and scale systems for monitoring power grids all over the world. You will be working closely with the rest of our excellent team in a fast-paced and young working environment. This role is not limited to a specific development role - you will be given the chance to learn about the different parts of our tech stack and adapt the work to your strengths.

You will

- Work with our proprietary IoT devices and cloud environment (Azure)
- Hands-on programming and problem solving, mainly in C#, Javascript/ReactJS and .NET frameworks
- Contribute to a supportive and inclusive culture in the engineering team
- Work in an interdisciplinary team consisting of developers, product specialists and data scientists
- Contribute to design and implementation of algorithms/models based on sensor-data.
- Help develop proof-of-concepts related to AI, machine learning and digital twins

You

- Recently graduated with a BSc/MSc degree in informatics, computer science or other technical degree.
- Candidates with 1 – 2 years of experience are also encouraged to apply.
- Have a strong programming skills and a desire to improve your skills as a developer.
- Enjoy working with complex problems.

- Want to learn about agile software development and DevOps.
- Want to pursue a meaningful vision related to the greatest challenge of our time.
- Are a team-player who wants to bring out the best in your colleagues.
- Enjoy working with a high degree of both freedom and responsibility.

We can offer

- Competitive salary and stock options program
- Positive, flexible and trust-based work environment
- Great new offices centrally located near Nationaltheateret in Oslo
- Subsidized lunch at a great canteen
- Excellent coffee from a local roastery
- Flexible working conditions
- Great colleagues & social events

Languages, frameworks & tools you will be working with

- .Net frameworks like ASP.NET, Azure functions and Entity Framework
- ReactJS
- C#
- Azure DevOps Pipelines for CI/CD

Send an application containing your CV, grades, and a short cover letter to Magnus Helgeby (magnus@heimdallpower.com). Norwegian or English.
