

Product Designer

Do you want to design products that will actually enable the green shift? We are searching for a **Product Designer** to join our team. We are a young Norwegian technology company working on digitizing the world's power grids - the backbone of our energy system. You will help design products and systems for monitoring power grids all over the world. Our products enable flexible & dynamic operation of the power grid, making it easier to integrate new sources of renewable energy. You will be working in a cross-functional team of talented developers, product specialists and data scientists and rely on both quantitative and qualitative data to make informed decisions.

Who we are

We are a team of 37 people from different backgrounds, based in Oslo and Stavanger. We develop industrial IoT devices for the power grid called "neurons" as well as a cloud-based software solution. Our technology has been deployed in 9 European countries, and we are growing rapidly. The company has a young and ambitious profile, and we continue to invest heavily into building both great teams and products. Our owners are well-known VC's and funds like Investinor, Saga Pure, Hafslund ECO, KLP and of course – the employees in the company.

What you will be working with

- Creating and maintaining design systems in Figma & other design tools
- Wireframing and prototyping new products and features using Figma
- Set design requirements based on information from internal teams and user research.
- Identify new product improvement opportunities
- Interview users and who manage our most critical infrastructure – the power grid
- Modify and revise existing designs to meet changing customer preferences.
- Present product design ideas to cross-functional teams and senior leadership.
- Contribute to a supportive and inclusive culture in the team

Who you are

- BSc or MSc within a relevant field such as industrial design, interaction design, CS or business.
- For non-design graduates; some experience with product design, UI/UX or product management
- Excellent attention to detail
- Ability to collaborate with cross-functional team members
- Ability to collect and interpret both qualitative and quantitative feedback
- Ability to effectively communicate and persuade around design concepts
- Interested in playing your part in the green transition.
- Self-motivated and independent thinker

Further, it would be great, but not required, if you have experience with any of the following

- Experience with Figma or similar design tools
- Highly technical products
- Experience from the energy industry or similar
- Previous start-up experience

What we offer

- Competitive salary and stock options program
- Positive, flexible and trust-based work environment
- Great office centrally located in Oslo, one of Europe's fastest growing cities.
- Subsidized lunch at a great canteen
- Coffee from Norð Oslo
- Flexible working conditions
- Great colleagues & social events
